

# Field Lab Accessory

Turn your Pendar X10 into a mobile lab

**PENDAR**  
TECHNOLOGIES

The Field Lab Accessory is an excellent match to the Pendar X10's unparalleled ability to identify explosives, drugs, and hazardous materials. Setting up in seconds, the Field Lab Accessory takes any guesswork out of the most demanding threat identification tasks. Its modular design allows fast identification of a wide range of samples, from pills and tablets to vials, bags, and bottles. Combined with the rapid autofocus and advanced optics of Pendar X10, the accessory can reduce scan time even further than in point-and-shoot operation.

**Attach and set up in seconds**

The accessory can transform workflows for triage in mobile or forensic centres, increasing throughput and reducing backlog. Whether in the laboratory or in the field, the Field Lab Accessory will increase the versatility of your Pendar X10.

Attachment Type	Robust bayonet mount
Weight	< 1 kg
Set up time	Less than 3 seconds

## Multiple scanning modes ready in seconds

4 mL standard vial holder for vials you already use

Pill, tablet, or capsule holder for any size

Open top mode for anything else the mission might bring

Call, email, or visit our website for more information or to arrange a demonstration.
